Rigorous Curriculum Design
Unit Planning Organizer

Subject(s) | Science
---|---
Grade/Course | First
Unit of Study | The Moon
Unit Type(s) | ☑ Topical ☑ Skills-based x Thematic

Priority Essential Standards

1.E.1
1E.1.1 – Recognize differences in the features of the day and night sky and apparent movement of objects across the sky as observed from Earth.
1.E.1.2 – Recognize patterns of observable changes in the moon’s appearance from day to day.

“UNWRAPPED” Priority Standards

1.E.1.1
Students know that objects in the sky have patterns of movement. Students know the sun is a star that can only be seen in the daytime, but the moon can be seen sometimes at night and sometimes during the day. Students know there are more stars in the sky than anyone can count, but they are not scattered evenly, and they are not all the same in brightness or color. Students know the sun, moon and stars all appear to move slowly across the sky.
1.E.1.2
Students know the moon looks a little different every day but looks the same again about every four weeks. They know that the moon’s observable changes follow a pattern.
## Essential Questions

<table>
<thead>
<tr>
<th>Essential Questions</th>
<th>Corresponding Big Ideas</th>
</tr>
</thead>
<tbody>
<tr>
<td>What are moon phases, stars and comets?</td>
<td>Students will recognize moon’s light is reflected from the sun. The sun is the largest star in our solar system. The moon has different phases and changes appearance. Students will recognize that objects move across sky, difference in night/day.</td>
</tr>
</tbody>
</table>
## Engaging Learning Experiences

## Research-Based Effective Teaching Strategies

- Check all those that apply to the unit:
  - Identifying Similarities and Differences
  - Summarizing and Note Taking
  - Reinforcing Effort, Providing Recognition
  - Homework and Practice
  - Nonlinguistic Representations
  - Cooperative Learning
  - Setting Objectives, Providing Feedback
  - Generating and Testing Hypotheses
  - Cues, Questions, and Advance Organizers
  - Interdisciplinary Non-Fiction Writing

## 21st Century Learning Skills

- Check all those that apply to the unit:
  - Teamwork and Collaboration
  - Initiative and Leadership
  - Curiosity and Imagination
  - Innovation and Creativity
  - Critical thinking and Problem Solving
  - Flexibility and Adaptability
  - Effective Oral and Written Communication
  - Accessing and Analyzing Information
  - Other

The Moon

Day 1 SCOS: 1.E.1.1/1.E.1.2

Introduce the Moon: Read the book: *Papa, Please get the Moon for Me* by Eric Carle.

Background for Teachers to instruct students: The moon orbits the Earth as the Earth orbits the sun. We can see the moon most nights, and often during the day too. The moon changes shape in a 29 ½ day cycle. The different shapes we see of the moon are called its phases. You can see surface details on the Moon even in the daytime and you do not need any special equipment. Because the moon has no atmosphere, there are no moon clouds to spoil your view. The dark patches you see are lowlands, the brighter areas are highlands.

Read the book – *Our Moon*, by Michael Burgan.

Think and Respond questions listed in the back of the book.

Go over facts about the moon with students (See teacher copy – www.mensaforkids.org)

Students will complete Number Facts (edhelper.com). Students must use codes to determine the answer to questions about the moon, distance, diameter and time to orbit the earth.

Students will also complete – The Far Side of the Moon worksheet (see teacher copy)

Day 2 SCOS: 1.E.1.1/1.E.1.2

Share *Four Men and the Moon* and *Star Money* stories from *Sky Tales*, by Michael Burgan.

Moon Crater Art Project – [See teacher copy – mensaforkids].

Moon Facts #1 and #2 puzzle to learn more facts about the moon (edhelper.com)
Day 3 SCOS: 1.E.1.1/1.E.1.2

Share the story – How Sun, Moon and Wind Went Out to Dinner, from Sky Tales, by Michael Burgan.

Footprints on The Moon maze – introduction discusses that the moon does not have an atmosphere and discusses footprints made by the first astronauts.

Apollo 11 worksheet – Students will discover the date that astronauts first landed on the moon.

Share Moon Myths from Edhelper.com with students.

Day 4 SCOS: 1.E.1.1/1.E.1.2

Introduce Moon Phases – (see teacher copy – Mensaforkids)

Match the name description of the moon phase to the picture.

Watch Video – teachertube.com “Phases of the moon” with kitty talking to moon. Another video is one made by kids. (Be sure to pull up early and have ready to go – it’s take a while for it to come up. My login is kthomas1964, password is cancer04.

http://www.google.com/url?q=http://teachertube.com/viewVideo.php%3Fvideo_id%3D9797%26title%3DThe%20Phases%20of%20the%20Moon%26sa=U%26ei=hukT7vlKoSutweU-YSaDQ&ved=0CAIQFjAA&client=internal-uds-cse&usg=AFQjCNGFX-B67W3c7odXSOSf5P14HnuNUZbQ

Introduce moon phase charts. Explain how to chart the moon phases correctly. Have students label moon calendar with dates. Students will chart moon phases for two weeks.

Distribute Moon Walking book (Edhelper.com) that discusses phases of the moon.

Day 5 SCOS: 1.E.1.1/1.E.1.2

Assessment on Moon Unit

See teacher copy
Moon Quiz

1. What exactly is our moon?
   a. Our moon is a rocket rotating around the earth.
   b. Our moon is a comet rotating around the earth.
   c. Our moon is a satellite rotating around the earth.
   d. Our moon is a space ship rotating around the earth.

2. The moon goes through how many phases?
   a. The moon goes through five phases.
   b. The moon goes through four phases.
   c. The moon goes through eight phases.
   d. The moon goes through two phases.

3. What part of the moon do we see?
   a. We can only see the near side of the moon.
   b. We can only see the far side of the moon.
   c. We can only see the dark side of the moon.
   d. We can only see the moon’s shadow.

4. What is a waxing moon?
   a. A moon that is growing smaller in size.
   b. A moon that is shrinking in size.
   c. A moon that is getting waxed to look shiny.
   c. A moon that is growing larger in size.
5. The moon has:
   a. craters
   b. valleys
   c. mountains
   d. all of the above

6. How long does it take for the moon to go through all its phases?
   a. about a month
   b. one day
   c. one week
   d. 3 months

7. What is true about the moon?
   a. It is made of stinky cheese.
   b. There is water on the moon.
   c. The moon does not have an atmosphere and no weather.
   d. The moon is green in the sky.
